CESSNA DENALI

NEW LEADER EMERGES

CESSNA DENALI

With a class-leading cabin, better performance, and superior economics, the Cessna Denali offers the highest level of comfort and productivity available in its category. Best of all, the Denali is backed by the world's leading manufacturer of business and personal aircraft – Textron Aviation.

- Widest, most comfortable cabin with unsurpassed amenities and configurability including optional aft lavatory.
- Large aft cargo door for superior versatility.
- Garmin™ G3000™ touch-screen avionics provide situational awareness and intuitive operation for the single-pilot.
- Advanced 1,240 shp GE turboprop engine; single lever power control with FADEC and a 4,000 hr TBO.
- McCauley-Blackmac® Carbon five-blade composite propeller with reversible pitch and ice protection.
- Short-field capable with rugged landing gear suitable for unimproved runways.
- Advanced technologies to achieve 20% lower operating costs.
- Fly with confidence. You're supported by the industry-leading manufacturer of business and personal aircraft.
